Yes, we will use a smooth edge bucket for all the excavations. The mini-excavator will come with one and we'll weld a blade across the teeth of the larger machine.

Don is wrapping up his current project this week and demobilizing. I don't believe he'll be able to stop by the site but will touch base with you early next week and get up to speed.

For the holiday schedule, I propose:

- Thanksgiving – secure site Tuesday 11/20 COB, demobe Wednesday 11/21 and remobilize Monday 11/26.
- Christmas – secure site Friday 12/21 COB, demobe Saturday 12/22 and remobilize on Wednesday Jan 2nd.

Evan

I think we need to consider getting a ditching bucket for the drainage pathways. We need to be able to easily change out buckets. Don, should be able to evaluate that when he comes through. Do you know the date Don will be coming through?

Also, we are on site today to do asbestos inspection of the building. Also, additional sampling along drainage path along cottonwood to the west to confirm extent. Also, we are pulling the profile samples.

Also, I would like to get a schedule from you guys on how you would like to handle the holidays (Thanksgiving, Christmas, New Years Day) taking into consideration that we are working in a residential area and not wanting to leave properties open.

Thanks
Gary Moore
